

SYSTEMS SYMPOSIUM 2026

November 16-19, 2026 Monterey, California

Panel Member

John Bergeron

President and Chief Executive Officer, Attalon, Inc.

John Bergeron is the President and Chief Executive Officer at Attalon, Inc., a provider of mission-critical optical and directed energy technologies.

Attalon is a leading technology partner to the global aerospace and defense industry, from high-energy directed laser systems to satellite optics and hypersonic thermal protection. With over 500 employees in the U.S., Attalon engineers critical optical, laser, and coating technologies that enable systems to see farther, target faster, and survive the harshest environments.

Bergeron joined Attalon in January 2026 with more than three decades of industry experience. He has a proven track record of growing complex aerospace and defense businesses at leading companies including CACI, Raytheon, GE, and Teledyne FLIR.

Prior to joining Attalon, Bergeron served as the senior vice president and leader of the Spectrum Superiority market within U.S. Operations at CACI International Inc, a Fortune 500™ company. In addition, he had an impressive 15-year tenure at Raytheon Technologies, where he took on roles including serving as vice president of Sustainment & Sensors, a Department of Defense franchise program with a budget of more than \$900 million.

Bergeron, who holds a Six Sigma master blackbelt and is a certified Six Sigma expert, is known for his operationally focused and team building leadership style; and has a distinguished reputation for delivering on challenging programs, building strong customer networks, and fostering a culture of performance and transparency.

He graduated from the University of Vermont with a bachelor's degree in electrical engineering. He is a member of the Institute of Electrical and Electronics Engineers and the American Society for Quality.
